

APHEO Strategic Plan 2013-2015

*APHEO improves population health
by supporting excellence in professional practice and promoting the integration of
epidemiology within public health decision making in Ontario.*

Strategic Areas of Focus 2013-2015	Purpose	High Leverage Actions (these serve as examples & an initial work plan)
Knowledge Exchange	Facilitate learning and the sharing of expertise	Create searchable databases and inventories of tools and information.
Networking	Build and strengthen the sense of community among APHEO members	Activate and support interest groups within the membership
Partnership Development	Forge external relationships that strengthen APHEO and the work of its members	Cultivate formal and informal partnerships with individuals and organizations that have expertise in population health
Professional Development Tools	Equip APHEO members to effectively carry out their professional practice	Continue to organize relevant conferences, webinars and workshops Support the development of an orientation package for new epidemiologists
Scientific Leadership	Influence decision making in support of epidemiological evidence and practice	Strengthen Core Indicators work Use Core Competencies to influence practices within health units and other public health settings Provide feedback to statistical/epidemiological software developers
Strategic Growth	Increase APHEO's capacity, resiliency, expertise and viability	Invest in a student liaison Promote APHEO services and expertise
Strong Governance and Operations	Ensure APHEO's "back office" functions are sufficient to support the achievement of its strategic plan	Invite members to contribute to association infrastructure Improve APHEO documentation Ensure capacity for timely responses
